

Student assistant for Financial Planning & Analysis

Do you want to develop your finance career in a growing start-up contributing to the green energy transition? Are you excited about financial forecasting and reporting analysis? Then you might want to work with geothermal energy and for Innargi.

We offer

Innargi is a geothermal company delivering energy for heating, founded in 2017 by A.P. Moller Holding and today jointly owned by A.P. Moller Holding, ATP and NRGi. Innargi's mission is to heat millions of urban homes while leaving zero impact on the planet by developing geothermal energy. With the combined expertise and knowledge of geologists, reservoir, facility and drilling engineers, and partnerships with local district heating companies, Innargi is in a unique position to turn ambitious plans into true change.

We are a small entrepreneurial and highly energised organisation. We work hard and we have fun doing it. As a team, we see our different backgrounds and experiences as a genuine source of strength, and we respect each other's technical and functional competencies. Our structure is lean and flat. We believe strongly in value creation through empowering our employees, and you will have significant independence to impact your role, as this is a new position.

As our Financial Planning & Analysis student you will be working in our head office in Lyngby, north of Copenhagen, supporting the finance department and assisting the team in developing the finance toolkits needed to support various reporting and analysis work.

Job description

Key responsibilities include:

- Financial forecasting and reporting analysis.
- Financial modelling, creating, standardizing, and managing Excel & PowerPoint templates related to various reporting and analysis.
- Ad hoc analysis, including investment analysis of various opportunities.

Competencies:

- Knowledge within corporate finance and financial reporting.
- Rolling forecasts, budgeting, and financial modelling.
- Strong expertise in Microsoft Office suite (Excel and PowerPoint).

We are looking for:

- You are in the final year of your bachelor's degree or in the beginning of your master's in finance or business.
- You can work approximately 2 days a week (~15 hours a week)
- You have an analytical mindset with good business acumen.
- You have strong communication and interpersonal skills.
- You have full professional proficiency in English – both verbal and written

About Innargi

As global warming continues to impact climate change, it's time to rethink the way we heat our urban buildings. Innargi wants to heat millions of urban homes while leaving zero impact on our planet by unearthing geothermal energy.

Our natural world is precious, and we can all make small changes to the way we live. But what our climate really needs is change at scale. Solar and wind have already transformed how we produce energy. What those technologies have done for electricity, geothermal can do for heating.

Innargi has the team to make it happen. With the combined expertise and knowledge of geologists, reservoir, facility and drilling engineers from the oil industry and our partnership with local district heating experts, we are in a unique position to turn ambitious plans into real change.
