

Senior Business Controller for Innargi

Do you want to join a fast-growing renewable energy company powering the way to a greener future? Do you want to be the center of financial expertise supporting our large-scale and capital-intensive geothermal projects, including our flagship project in Denmark? And do you have strong analytical skills combined with a flair for communication and stakeholder management? If so, then this position with Innargi may be your match!

We offer

Innargi is a geothermal company delivering energy for heating, founded in 2017 by A.P. Moller Holding and today jointly owned by A.P. Moller Holding, ATP and NRGi. Innargi's mission is to heat millions of urban homes while leaving zero impact on the planet by developing geothermal energy.

We are a small entrepreneurial and highly energised organisation. We work hard and we have fun doing it. As a team, we see our different backgrounds and experiences as a genuine source of strength, and we respect each other's technical and functional competencies. Our structure is lean and flat. We believe strongly in value creation through empowering our employees, and you will have significant independence to impact your role, as well as be expected to collaborate across disciplines. The team is small and agile with a variety of tasks to carry out, and we pull together to accomplish our goals. You will join a dynamic and growing company, where you will help shape and develop our business.

Job description

As Senior Business Controller at Innargi you will be part of the Finance team and report directly to the CFO. You will play a key role in building the Finance function as the centre of expertise with respect to establishing reliable and accurate data and driving financial management. You will serve as a trusted sparring partner for the senior management and our projects managers where your professionalism and advice will serve as basis for sound financial decision-making to ensure the financial viability of our business and projects. As we build and grow the Finance function, there will be many opportunities for you to influence key processes and systems and assume responsibility for development projects.

As Senior Business Controller your responsibilities will include, but will not be limited to:

- Building and maintaining the cube of actual and forecasted financial data to form basis for our internal and external reporting
- Working closely with senior management, department heads, and project managers to collect and consolidate financial forecasts (feeding into the data cube)
- Developing accurate and timely management reporting (monthly and quarterly)
- Facilitating financial review meetings with senior management and department heads
- Providing functional support on large scale industrial projects

As Senior Business Controller you will work closely with our Head of Accounting, our Head of FP&A and Economics, our project managers, and the senior management team.

The position as Senior Business Controller will be based in Lyngby, north of Copenhagen. Infrequent travel may occur, initially to our Aarhus, where we are building our first geothermal facility.

We are looking for

Our Senior Business Controller should:

- Hold a master's degree in Finance or Economics combined with relevant working experience (minimum 5 years)
- Possess strong analytical and problem-solving skills and be motivated by establishing new insights based on facts and data
- Be comfortable navigating at all organisational levels and across multiple stakeholders to establish alignment and identify common ground solutions based on constructive dialogue
- Have a demonstrated ability to deliver concise messaging interfacing with various audiences

About us

As global warming continues to impact climate change, it's time to rethink the way we heat our urban buildings. Innargi wants to heat millions of urban homes while leaving zero impact on our planet by unearthing geothermal energy.

Our natural world is precious, and we can all make small changes to the way we live. But what our climate really needs is change at scale. Solar and wind have already transformed how we produce energy. What those technologies have done for electricity, geothermal can do for heating.

Innargi has the team to make it happen. With our combined knowledge and expertise on subsurface, drilling, engineering, and energy planning and through close partnerships with local district heating companies, we are in a unique position to turn ambitious plans into real change.
