

Engineering Analyst for Innargi

Do you have broad experience working with engineering?

Are you an excellent communicator with great collaboration skills?

And would you thrive in a role where you can integrate knowledge about district heating, technical process facilities, geothermal development plans and business development?

We offer

Innargi is a geothermal company delivering energy for heating, founded in 2017 by A.P. Moller Holding and today jointly owned by A.P. Moller Holding, ATP, and NRGi.

We are a small entrepreneurial and highly energised organisation. We work hard and enjoy what we do. As a team, we see our different backgrounds and experiences as a genuine source of strength, and we respect each other's technical and functional competencies. Our structure is lean and flat. We believe strongly in value creation through empowering our employees, and you will have significant independence to impact your role, as well as be expected to collaborate across disciplines. The team is small and agile with a variety of tasks to carry out, and we pull together to accomplish our goals. You will join a dynamic and growing company, where you will help shape and develop our business as a whole.

Job description

As Engineering Analyst at Innargi A/S, you will report to our Head of Geothermal Solutions and be expected to play a key role in the technical part of the business development process leading up to the execution of new geothermal plants. You will be responsible for building cost models for new and existing projects in close collaboration with internal geoscience, business development, and project departments with the aim of creating optimized plans for new geothermal developments.

The following work tasks also fall within your responsibility:

- Utilize and develop cost models for geothermal project development and operational costs.
- Work with technical, project, business development and finance team to structure costing and risk profile of projects.
- Support engineering, subsurface and drilling team with analyses and reports.

The position as Engineering Analyst will be based in Lyngby with opportunities for flex work with some travel to our potential customers in Denmark and later other locations.

We are looking for

Our Engineering Analyst should have 5 years' experience within the technical and commercial aspects of district heating, energy development, and/or oil and gas engineering or production. For the successful candidate, knowledge of geoscience, reservoir engineering, and/or process design is an advantage but not a requirement.

- Engineering background – preferably in mechanical, process or production engineering.
- Generalist with a good technical background and a flair for economy.

- Financial model understanding and integrations with technical models.
- Solution oriented, ability to identify and envision opportunities in complex systems.
- Flexible and able to adapt in a fast-paced changing environment.
- Able to communicate fluently in English.
- Interest in energy, passion for green transition.

About us

As Global warming continues to impact climate change, it's time to rethink the way we heat our urban buildings. Innargi wants to heat millions of urban homes while leaving zero impact on our planet by unearthing geothermal energy.

Our natural world is precious, and we can all make small changes to the way we live. But what our climate really needs is change at scale. Solar and wind have already transformed how we produce energy. What those technologies have done for electricity, geothermal can do for heating.

Innargi has the team to make it happen. With our combined knowledge and expertise on subsurface, drilling, engineering, and energy planning and through close partnerships with local district heating companies, we are in a unique position to turn ambitious plans into real change.

Application

It is a requirement that you have a valid work permit for Denmark, as unfortunately we cannot sponsor this.

Deadline for applications: 3 February 2023. We will continuously review the applications and call for interviews. Please send your application to HR Consultant Cecilie.hansen@innargi.com.

For questions or more information about the position, please contact Head of Geothermal Solutions, Martin Kaster at martin.kaster@innargi.com or + 45 29 26 51 56. For information about the recruitment process, please reach out to Cecilie Hansen at Cecilie.hansen@innargi.com.
