

Facility Solutions Architect for Innargi

Do you have broad experience working with facility design and innovation and do you have experience from implementing new technologies?

Are you an excellent communicator with great collaboration skills?

And do you thrive in a role where you can support and improve development and operations through application of new technology and innovation?

We offer

Innargi is a geothermal company delivering energy for heating, founded in 2017 by A.P. Moller Holding and today jointly owned by A.P. Moller Holding, ATP, and NRGi.

We are a small entrepreneurial and highly energised organisation. We work hard and enjoy what we do. As a team, we see our different backgrounds and experiences as a genuine source of strength, and we respect each other's technical and functional competencies. Our structure is lean and flat. We believe strongly in value creation through empowering our employees, and you will have significant independence to impact your role, as well as be expected to collaborate across disciplines. The team is small and agile with a variety of tasks to carry out, and we pull together to accomplish our goals. You will join a dynamic and growing company, where you will help shape and develop our business.

Job description

As Facility Solutions Architect at Innargi A/S, you will report to our Head of Geothermal Solutions and play a key role in the continued development of Innargi's production facility concepts. You will also be responsible for delivery of new improved facility concepts in close collaboration with the project executing team, who builds the facilities, and the operations department, which is the end-user.

The following work tasks also fall within your responsibility:

- Responsible for continued development of Innargi's standardized and modularized process facility concept including
 - Evaluation and implementation of new ideas for facility improvements
 - Adapting novel technologies and techniques in new and existing facilities in close collaboration with end users – internal and external.
 - Spearheading new ideas and concepts for continual improvements of processes and operations.
- Work with project departments on implementation of facility concepts in new projects.
- Work with operational department to understand improvement opportunities as well as evaluate potential technology introductions or improvements.

The position as Facility Solutions Architect will be based in Lyngby with frequent travel to our operations in Aarhus and later other locations.

We are looking for

Our Facility Solutions Architect should have minimum 10 years' experience within production/heat facility design and innovation, preferably from the oil and gas industry, geothermal, district heating or similar. Additional experience from working with business development and customer-centric designs.

- Background in process engineering or mechanical engineering.
- Flair for innovation and working with complex systems.
- General understanding of economics and innovation economy.
- Solution oriented, ability to identify and envision opportunities in complex systems.
- Flexible and able to adapt in a fast-paced changing environment.
- Able to communicate fluently in English.
- Interest in energy, passion for green transition.

About us

As Global warming continues to impact climate change, it's time to rethink the way we heat our urban buildings. Innargi wants to heat millions of urban homes while leaving zero impact on our planet by unearthing geothermal energy.

Our natural world is precious, and we can all make small changes to the way we live. But what our climate really needs is change at scale. Solar and wind have already transformed how we produce energy. What those technologies have done for electricity, geothermal can do for heating.

Innargi has the team to make it happen. With our combined knowledge and expertise on subsurface, drilling, engineering, and energy planning and through close partnerships with local district heating companies, we are in a unique position to turn ambitious plans into real change.
