

Head of Subsurface for Innargi

Do you have broad experience working with subsurface evaluations and management?

Are you a caring leader who drives a culture of excellence, teamwork, foresight, and diligence?

Do you want to work towards a greener world and reduce our dependence on fossil fuels?

We offer

Innargi is a geothermal company delivering energy for heating, founded in 2017 by A.P. Moller Holding and today jointly owned by A.P. Moller Holding, ATP and NRGi.

We are a small entrepreneurial and highly energised organisation. We work hard and enjoy what we do. As a team, we see our different backgrounds and experiences as a genuine source of strength, and we respect each other's technical and functional competencies. Our structure is lean and flat. We believe strongly in value creation through empowering our employees, and you will have significant independence to impact your role, as well as be expected to collaborate across disciplines. The team is small and agile with a variety of tasks to carry out, and we pull together to accomplish our goals. You will join a dynamic and growing company, where you will help shape and develop our business.

Job description

As Head of Subsurface you will lead a rapidly growing multidisciplinary subsurface team and have overall responsibility for the subsurface evaluation of projects from screening, exploration, development through to operations. Head of Subsurface reports to our CTO and plays a key role in the technical management team that sets the course for technical excellence and culture within the organization, be it at our head office or on-site locally.

The Head of Subsurface also

- Ensures integration of subsurface data and analyses into exploration plans and subsurface development concepts
- Closely interfaces with other technical, project and commercial departments
- Drives subsurface evaluations
- Is in charge of geothermal licenses and communication with related authorities
- Oversees operations in geology
- Leads production operations: subsurface operations and interventions
- Provides technical input to international business development work

The position Head of Subsurface will be based in Lyngby with travel to our projects in Denmark and abroad and opportunities for flex work.

We are looking for

Our Head of Subsurface should have a minimum 10 years' experience of which at least three should be as a manager and be a team player and leader with an aptitude to question and challenge in a constructive manner. We are looking for someone with significant exposure to integrated development studies and exploration evaluations and with experience in a range of technical skills, for example production operations, reservoir modeling, drilling/completions engineering, facilities engineering and project management. Someone who has experience of risk and uncertainty analysis across subsurface development within both static and dynamic realms and is an astute practitioner of business and project economics.

About us

As Global warming continues to impact climate change, it's time to rethink the way we heat our urban buildings. Innargi wants to heat millions of urban homes while leaving zero impact on our planet by unearthing geothermal energy.

Our natural world is precious, and we can all make small changes to the way we live. But what our climate really needs is change at scale. Solar and wind have already transformed how we produce energy. What those technologies have done for electricity, geothermal can do for heating.

Innargi has the team to make it happen. With our combined knowledge and expertise on subsurface, drilling, engineering, and energy planning and through close partnerships with local district heating companies, we are in a unique position to turn ambitious plans into real change.
