

## Senior Solutions Engineer for Innargi

*Do you have broad experience working with business development within in the energy sector?*

*Are you an excellent communicator with great collaboration skills?*

*And would you thrive in a role where you can integrate knowledge about district heating, technical process facilities, geothermal development plans and business development?*

### **We offer**

Innargi is a geothermal company delivering energy for heating, founded in 2017 by A.P. Moller Holding and today jointly owned by A.P. Moller Holding, ATP, and NRGi.

We are a small entrepreneurial and highly energised organisation. We work hard and we have fun doing it. As a team, we see our different backgrounds and experiences as a genuine source of strength, and we respect each other's technical and functional competencies. Our structure is lean and flat. We believe strongly in value creation through empowering our employees, and you will have significant independence to impact your role, as well as be expected to collaborate across disciplines. The team is small and agile with a variety of tasks to carry out, and we pull together to accomplish our goals. You will join a dynamic and growing company, where you will help shape and develop our business.

### **Job description**

As Senior Solutions Engineer at Innargi A/S, you will report to our Head of Geothermal Solutions and play a key role in the technical part of the business development process leading up to the execution of new developments of geothermal plants. You will be responsible for building geothermal development plans in close collaboration with internal geoscience and project departments and the customer's technical department to create optimized plans for new geothermal developments.

The following work tasks also fall within your responsibility:

- Develop geothermal development plans in close collaboration with district heating customers.
- Work with technical, project, business development and finance team to assess geothermal project opportunities.
- Be the technical lead in contract negotiations with potential customers.

The position as Senior Solutions Engineer will be based in Lyngby with some travel to our potential customers in Denmark and other locations.

### **We are looking for**

Our Senior Solutions Engineer should have +10 years' experience within the technical and commercial aspects of district heating, energy development, and/or geothermal and/or oil and gas production. For the successful candidate, knowledge of geoscience, reservoir engineering and/or process design is an advantage but not a requirement.

- Background in process engineering, mechanical engineering, or electrical engineering.
- Generalist with a good technical background and a flair for economy.
- Solution oriented, ability to identify and envision opportunities in complex systems.

- Flexible and able to adapt in a fast-paced changing environment.
- Able to communicate fluently in English.
- Interest in energy, passion for green transition.

### **About us**

As Global warming continues to impact climate change, it's time to rethink the way we heat our urban buildings. Innargi wants to heat millions of urban homes while leaving zero impact on our planet by unearthing geothermal energy.

Our natural world is precious, and we can all make small changes to the way we live. But what our climate really needs is change at scale. Solar and wind have already transformed how we produce energy. What those technologies have done for electricity, geothermal can do for heating.

Innargi has the team to make it happen. With our combined knowledge and expertise on subsurface, drilling, engineering, and energy planning and through close partnerships with local district heating companies, we are in a unique position to turn ambitious plans into real change.
