

Aarhus Operations Manager for Innargi

Do you have broad experience working within operations and do you have experience with data driven maintenance and optimization practices?

Are you an excellent communicator with great collaboration skills?

And do you thrive in a dynamic role where you will be part of building our operations organization and systems?

We offer

Innargi is a geothermal company delivering energy for heating, founded in 2017 by A.P. Moller Holding and today jointly owned by A.P. Moller Holding, ATP and NRGi.

We are a small entrepreneurial and highly energised organisation. We work hard and enjoy what we do. As a team, we see our different backgrounds and experiences as a genuine source of strength, and we respect each other's technical and functional competencies. Our structure is lean and flat. We believe strongly in value creation through empowering our employees, and you will have significant independence to impact your role, as well as be expected to collaborate across disciplines. The team is small and agile with a variety of tasks to carry out, and we pull together to accomplish our goals. You will join a dynamic and growing company, where you will help shape and develop our business.

Job description

As Operations Manager, you will report to our COO and be expected to play a key role in the development of Innargi's operations organisation. As we build the first of in all seven planned heating plants in Aarhus, you will be responsible for setting the standards for O&M of the plant as well as setting up the systems to support the transition from project to operations. Once in operation, you will be accountable for performance of the geothermal energy production system and have P&L responsibility under the Aarhus contract. You will be the key interface with our customer at a commercial level during the operations phase and in that capacity responsible for building and maintaining a good working relationship to the benefit of both parties. As our organisation grow the role may over time include leadership responsibilities for the O&M team.

The following work tasks also fall within your responsibility:

- Define O&M standards and procedures for key equipment based on vendor input and Innargi operations philosophy.
- Provide input to setting up data models for equipment performance.
- Plan and initiate facility maintenance in accordance with maintenance standards.
- Optimize performance of geothermal facilities based on input from data analytics on equipment sensor data.
- Benchmark performance across sites and drive adaptation of learnings.
- Hold service contracts with third party for facility related services.
- Prepare facility OPEX budgets and monthly sales report for internal and customer use.

The position as Operations Manager will be based in Lyngby with travel to our operations in Aarhus and other Danish locations.

We are looking for

Our Aarhus Operations Manager should have minimum 10 years' experience within operations, preferably from the energy industry or similar where a strong safety performance is a must. It is important to have a collaborative mindset and be able to work effectively across disciplines in both Danish and English. The individual hired would also optimally have:

- Proven track record of optimizing and driving best practice operations performance across sites.
- Commercial mindset and experience with managing long term contracts and building strong, lasting customer relationships.
- At least five years of leadership experience across functional levels.
- Knowledge of and experience with data driven maintenance and optimization practices.

About us

As Global warming continues to impact climate change, it's time to rethink the way we heat our urban buildings. Innargi wants to heat millions of urban homes while leaving zero impact on our planet by unearthing geothermal energy.

Our natural world is precious, and we can all make small changes to the way we live. But what our climate really needs is change at scale. Solar and wind have already transformed how we produce energy. What those technologies have done for electricity, geothermal can do for heating.

Innargi has the team to make it happen. With our combined knowledge and expertise on subsurface, drilling, engineering, and energy planning and through close partnerships with local district heating companies, we are in a unique position to turn ambitious plans into real change.
