

# Sustainability Specialist at Innargi A/S

Do you have a passion for sustainability?

Would you like to participate in creating a roadmap towards net zero heating for urban homes?

Are you an excellent communicator with great collaboration skills?

And do you thrive in a role where we learn as we go along, and we are guided by our purpose – to decarbonize heat?

**Then join us.**

We are looking for an energetic Sustainability Specialist to join our team.

The position offers a unique opportunity for an ambitious and passionate sustainability professional who wants to work in an innovative and sustainable company and your mission will be to translate our sustainability strategy into tangible initiatives, projects and goals and ensure that our ESG reporting complies with the highest standards.

As our Sustainability Specialist, you will be responsible for completing and maintaining a Life Cycle Assessment in collaboration with an external partner, and you will work with our functions to translate the results into projects that can lead us to net zero.

You will work with internal and external stakeholders to create an ESG reporting framework that will satisfy current as well as future investors and provide Innargi with a dynamic decision-making tool.

You will report to our Head of Sustainability and HSSE.

## **Responsibilities**

- Translate Innargi's sustainability strategy into tangible initiatives, projects, and goals.

- Completing and maintaining our Lifecycle Assessment in collaboration with an external partner.
- Together with our Technical Department develop a roadmap that will lead us towards Net Zero.
- Work with internal and external stakeholders to create an ESG reporting framework that will satisfy current as well as future investors and provide Innargi with a dynamic decision-making tool.

### **Requirements include**

- Minimum a Bachelor's Degree in Sustainable Energy, Environmental Science, Environmental Engineering or similar.
- Experience from managing sustainability initiatives, project management, mapping carbon footprint and life cycle assessment. Experience with ESG reporting will be an advantage.
- Knowledge from working with geothermal energy and district heating is an advantage, but not a requirement.
- The ability to work independently, take ownership of projects and deliver results on time.
- A strong analytical mindset and the capacity to translate complexity to concrete plans and actions.
- Excellent communication and team player skills.
- Knowledge of the Danish language is not a requirement.

### **Background**

Innargi is a geothermal company delivering energy for heating, founded in 2017 by A.P. Moller Holding and today jointly owned by A.P. Moller Holding, ATP and NRGi. We have projects under development at different stages in Aarhus, Copenhagen, Holbæk, Skanderborg, Sønderborg, Poznan, Kiel, Flensburg, and Budapest.

We are a small entrepreneurial and highly energised organisation. We work hard and we have fun doing it. As a team, we see our different backgrounds and experiences as a genuine source of strength, and we respect each other's technical and functional competencies.

Our structure is lean and flat. We believe strongly in value creation through empowering our employees, and you will have significant independence to impact your role, as well as be expected to collaborate across disciplines.

As Global warming continues to impact climate change, it's time to rethink the way we heat our urban buildings. Innargi wants to heat millions of urban homes while leaving zero impact on our planet by unearthing geothermal energy.

Our natural world is precious, and we can all make small changes to the way we live. But what our climate really needs is change at scale. Solar and wind have already transformed how we produce energy. What those technologies have done for electricity, geothermal can do for heating.

Innargi has the team to make it happen. With our combined knowledge and expertise on subsurface, drilling, engineering, and energy planning and through close partnerships with local district heating companies, we are in a unique position to turn ambitious plans into real change.

The position will be based in Lyngby with some travel to our operations in Århus and later, other locations.

### **Application**

It is a requirement that you hold a valid residence and work permit for Denmark, as unfortunately we cannot sponsor or administer this.

**We look very much forward to hearing from you.**

**Deadline for applications:  
5 October 2023**
