

Technical Project Manager at Innargi A/S

Do you want to join a fast-growing renewable energy company decarbonizing heating across Europe?

Are you solution oriented, have a drive to succeed and enjoy leading teams to create and develop successful projects? Do you have technical background with experience in maturing commercial projects from idea to execution?

If so, then this position with Innargi may be your match!

As Technical Project Manager you will report to our Chief Technical Officer and lead a coordinated effort to strategically mature and develop technical input with commercial options to design successful projects. You will partner with our commercial team to drive projects from origination, through feasibility stage and to contract execution. As Technical Project Manager you will be expected to have a deep understanding of how options and decisions related to subsurface, drilling and facility design are interlinked and impact project results, with the ability to identify alternative concepts that can be compared to support management decisions on optimal economical solutions.

Responsibilities

- Partner and align with Commercial to advance opportunities.
- Drive and be responsible for the technical maturation of project opportunities, including the costing process, technical concept selection, planning and workflows.
- Liaise closely across the technical department and the Innargi organization to ensure alignment of technical feasibility with customer and commercial targets.
- Project manage the technical aspects of project maturation and delivery including customer partnering.

- In person meetings with customers, working through technical issues and identifying opportunities and risks.
- Drive activities related to licensing and data access.

Requirements include

- Bachelor's or master's degree in engineering, geoscience or other related subject.
- Technical background with significant hands-on experience within business development, technical screening, concept selection (subsurface, drilling and surface), permitting, appraisal, project execution and operations.
- Strong organizational and analytical skills with the ability to manage multiple projects simultaneously.
- Excellent communication and interpersonal skills.
- To succeed in this role, it is important that you are solution oriented, proactive and have the ability to drive project teams to successful outcomes.
- Fluency in English along with either German or Polish.

Background

Innargi is a geothermal company delivering energy for heating, founded in 2017 by A.P. Moller Holding and today jointly owned by A.P. Moller Holding, ATP and NRGi. We have projects under development at different stages in Aarhus, Copenhagen, Holbæk, Skanderborg, Sønderborg, Poznan, Kiel, Flensburg, and Budapest.

We are a small entrepreneurial and highly energised organisation. We work hard and we have fun doing it. As a team, we see our different backgrounds and experiences as a genuine source of strength, and we respect each other's technical and functional competencies.

Our structure is lean and flat. We believe strongly in value creation through empowering our employees, and you will have significant independence to impact your role, as well as be expected to collaborate across disciplines.

As Global warming continues to impact climate change, it's time to rethink the way we heat our urban buildings. Innargi wants to heat millions of urban homes while leaving zero impact on our planet by unearthing geothermal energy.

Our natural world is precious, and we can all make small changes to the way we live. But what our climate really needs is change at scale. Solar and wind have already transformed how we produce energy. What those technologies have done for electricity, geothermal can do for heating.

Innargi has the team to make it happen. With our combined knowledge and expertise on subsurface, drilling, engineering, and energy planning and through close partnerships with local district heating companies, we are in a unique position to turn ambitious plans into real change.

The position will be based in Lyngby, Denmark with frequent travel to core markets and customers.
