

Student Assistant at Innargi A/S

Do you want to join a fast-growing renewable energy company powering the way to a greener future?

Would you like to support the maturation of our projects?

Are you proactive and looking to learn while supporting a growing business?

As Student Assistant in the Project Maturation Office at Innargi A/S, you will contribute to the maturation of our project pipeline.

Responsibilities

- Support Project Managers in their daily activities.
- Support updates of Innargi's Project Maturation Process (PMP).
- Participate in Project Meetings, Review Workshops and Decision Gates, with an active role in facilitating the sessions.
- Generate reports and templates.

Requirements include

- Ongoing Engineering or Project Management Studies (last year)
- Have an interest in Project Management and the renewable industry.
- Willingness to learn and take new tasks, with clear deadlines.
- Excellent analytical and problem-solving skills
- Strong communication and interpersonal skills and experience with PowerPoint.
- To succeed in this role, it is important that you are proactive, have a drive to succeed and the ability to work both independently and in teams.

Background

Innargi is a geothermal company delivering energy for heating, founded in 2017 by A.P. Moller Holding and today jointly owned by A.P. Moller Holding, ATP, Sampension and NRGi. We have projects under development at different stages in Aarhus, Copenhagen, Kiel, Berlin, Poznan, Łódź, and Budapest.

We are a small entrepreneurial and highly energised organisation. We work hard and we have fun doing it. As a team, we see our different backgrounds and experiences as a genuine source of strength, and we respect each other's technical and functional competencies.

Our structure is lean and flat. We believe strongly in value creation through empowering our employees, and you will have significant independence to impact your role, as well as be expected to collaborate across disciplines.

As Global warming continues to impact climate change, it's time to rethink the way we heat our urban buildings. Innargi wants to heat millions of urban homes while striving to leave zero impact on our planet by unearthing geothermal energy.

Our natural world is precious, and we can all make small changes to the way we live. But what our climate really needs is change at scale. Solar and wind have already transformed how we produce energy. What those technologies have done for electricity, geothermal can do for heating.

Innargi has the team to make it happen. With our combined knowledge and expertise on subsurface, drilling, engineering, and energy planning and through close partnerships with local district heating companies, we are in a unique position to turn ambitious plans into real change.

The position will be based in Lyngby.
